About This Book

This manual is designed to be your personal safety shield. Think of it like a training manual for a superhero. It breaks down the most important rules of body safety, invisible boundaries, and how to protect yourself into easy, empowering steps.

We live in a big world, and while most people are kind and safe, we all need to know what to do if we run into a situation that feels wrong. This book is based on the rules of the POCSO Act (Protection of Children from Sexual Offences). That simply means there is a very strong law in India made specifically to keep kids exactly like you safe and protected at all times.

Who Is This Book For?

This guide is for smart, brave kids (under 18 years old) who want to learn how to **own their space, trust their instincts**, and stand up for their rights!

It is also a fantastic tool for your parents, your favorite teachers, and your school counselors to read with you. When adults and kids read this together, it builds a safe, trusting, and open environment where no topic is too scary to talk about.

You are the boss of your body!
